## DETAILED ACTION

### *Allowable Subject Matter*

1. The indicated allowability of claim 21 is withdrawn in view of the newly discovered reference(s) to George (USP. 6,116,748). Rejections based on the newly cited reference(s) follow.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 21 rejected under 35 U.S.C. 102(e) as being anticipated by George (USP. 6,116,748).

Claims (method) 21 given the apparatus for directing a beam pattern of at least one light emitting diode, the method for the apparatus as claimed in claim 21 is inherent.

Regarding claim 21, George disclose a method of directing the beam pattern of at least one light emitting diode in Fig. 5, comprising the step of placing a primary lens 42 in the beam path of each of the light emitting diodes (46) (Fig. 6), and placing a zoom lens (44) in the directed beam pattern from the at least one primary lens (Fig. 5), and varying the distance (d) between the at least one primary lens and the zoom lens to focus (shaped) the beam pattern of the LEDs (Col. 3, Line 17-29).
